Professional Summary

Software Developer with experience designing, developing, and deploying scalable web applications, enterprise systems, and digital platforms. Skilled in full-stack development using Python, Django, PHP, Laravel, JavaScript, and Node.js, with expertise in API development, database design, payment integrations, and cloud-based deployment. Currently contributing to the architecture, development, and maintenance of production systems across multiple industries. Passionate about building reliable, secure, and scalable technology solutions that solve real-world problems and drive digital transformation.

PROFESSIONAL EXPERIENCE

System Administrator

Kenya Airports Authority – Nairobi, Kenya

April 29, 2024 – July 25, 2024

- Assisted in managing and maintaining IT infrastructure including servers, network devices, and end-user systems.
- Provided technical support to staff at Jomo Kenyatta International Airport, resolving hardware and software issues.
- Participated in cybersecurity assessments and routine system monitoring using tools like Nmap and Metasploit.
- Helped document IT procedures and updated internal knowledge bases for troubleshooting.
- Supported the deployment of new software systems and user training sessions.

PulseWave Technologies – Ruiru

Duration: 4th February 2025 – To Date - Software Developer / Lead Software Developer

- Progressed from Software Developer to Lead Software Developer, contributing to full-stack system development, deployment, and maintenance of production systems.
- Develop and maintain full-stack applications used in production environments.
- Design and implement RESTful APIs for web and mobile platforms.
- Build scalable backend systems using Python, Django, Node.js, and relational databases.
- Implement secure authentication, role-based access control, and data validation.
- Integrate third-party services including M-Pesa payments, SMS, and notification APIs.
- Collaborate with frontend developers to deliver responsive and user-friendly interfaces.
- Lead frontend architecture improvements and enforce code quality standards.
- Participate in deployment and server configuration on Linux environments.

Gulf Africa Innovation Technologies

Duration: 8th September 2025 - Present (Part-time) Software Developer / Lead Frontend Developer

- Software Developer for a period of six months, also serving as a Lead Frontend Developer overseeing frontend development across multiple projects. Responsible for frontend architecture, UI upgrading and enhancement, implementation, code quality, and coordination with backend developers to ensure consistent, user-friendly, and timely delivery of project requirements.
- Led frontend architecture improvements, UI upgrades, and performance optimization for production systems.
- Contributed to the development of major platforms including **AMAC Africa Mega Agri Corp** and the **Digiafya Health Platform**.
- Integrated external systems and financial platforms including **Trevex**, **KCB**, and **Finsprint** to enable payments, financial services, and third-party data exchange.
- Collaborated with backend engineers to design and implement secure REST APIs and ensure smooth integration between frontend and backend services.
- Maintained code quality through structured reviews, documentation, and adherence to modern development best practices.
- Coordinated development tasks to ensure timely delivery of project requirements across multiple teams.

EDUCATION

KCA University

Bachelor of Science in Applied Computing majoring in Software Development

September 2020 - November 2024.

Igembe Boys' High School

KCSE Grade:

B 2017-2019

CERTIFICATIONS

Cyber Security – Zalego Academy

Certificate in Programming Python – KCAU

Networking basics - Cisco Networking Academy

Selected Projects & Professional Systems

- DigiAfya Health Platform

<https://digiafya.com/>

Developed platform modules for a digital healthcare system including authentication and data Management.

- Nyota Fund System

<https://nyota.execuget.co.ke/> || <https://nyotaproject.go.ke/>

Contributed to development of a government fund management system supporting project tracking and reporting.

- AMAC Africa Mega Agri Corp

<https://mazao.amacplc.com/> || <https://comex.amacplc.com/>

Developed marketplace features connecting farmers and buyers including dashboards and product management.

- Peakridge Real Estate CRM

<https://app.peakridge.co.ke/>

Designed and developed a multi-module CRM platform with lead management, project management, and role-based dashboards

- FACT Limited Website

<https://factfarm.africa/>

Designed and developed the official website for **FaCT Ltd.**

Implemented responsive UI and optimized website performance for accessibility across devices.

Developed frontend components and structured layouts to improve usability and content presentation.

Deployed the platform and configured hosting environment for production use. Worked closely with stakeholders to translate organizational requirements into a functional digital platform

- Nairobi Pesa City (NPC)

<https://npc-ifc.com/> || <http://invest-sukuk.npc-ifc.com/>

Contributed to the design and development of the Nairobi Pesa City digital platform, a financial ecosystem initiative aimed at positioning Nairobi as a leading international financial hub. Participated in frontend and backend development, user experience enhancements, system integration, and implementation of scalable web solutions supporting financial institutions, investors, innovators, and stakeholders within the Nairobi International Financial Centre ecosystem.

- AMAC Oil & Gas Marketplace Platform

<https://petroleum.amacplc.com/>

Contributed to the development of AMAC Oil & Gas, an integrated digital marketplace connecting fuel suppliers, LPG distributors, lubricant providers, auto parts vendors, and asset financing services across Kenya. Participated in the design and implementation of scalable platform features, user interfaces, system integrations, and marketplace functionality supporting supply chain management, digital commerce, inventory visibility, embedded finance, and nationwide stakeholder engagement.

CORE SKILLS

Programming Languages: Python, PHP, JavaScript, Node.js

Frameworks & Libraries: Django, Laravel, React

Web Development: HTML5, CSS3, Responsive Web Design, RESTful APIs

Databases: MySQL (Schema Design, Query Optimization, Database Migrations)

Cloud & DevOps: Docker, Kubernetes, Linux Administration, CI/CD Fundamentals, Application Deployment

Server & Deployment: Application Hosting, Domain & SSL Configuration, Production Server Management

Payments & Integrations: M-Pesa Integration, Payment APIs, SMS APIs, Notification Services

Version Control: Git, GitHub

SOFTWARE DEVELOPMENT & SYSTEMS

- Full-stack web application development from database design to frontend implementation.
- Design and development of enterprise systems, CRM platforms, digital marketplaces, and government solutions.
- Development of scalable backend systems using Python, Django, and Node.js.
- Design and implementation of RESTful APIs for web and mobile applications.
- Implementation of secure authentication, authorization, data validation, and Role-Based Access Control (RBAC).
- Integration of third-party services including payment gateways, SMS platforms, notification services, and external APIs.
- System documentation, maintenance, troubleshooting, and performance optimization.
- Deployment and management of production applications on Linux-based environments.

CYBERSECURITY

- Conducted penetration testing and security assessments using Kali Linux, Nmap, and Metasploit.
- Performed network reconnaissance and vulnerability assessments to identify and mitigate security risks.
- Applied web application security best practices to protect against common vulnerabilities and threats.
- Implemented Role-Based Access Control (RBAC) principles to strengthen system security and user access management.
- Studied AWS security fundamentals, including defense-in-depth strategies and secure infrastructure design.
- Developed practical knowledge in network security, endpoint protection, and secure systems administration.

VOLUNTEER EXPERIENCE

SCOUTS - January 2011 – November 2014

St Johns Ambulance

January 2017- November 2019
